What is this product?

Type

Shares of a sub-fund of Fidelity UCITS II ICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS).

Term

This fund is open-ended. The Management Company is not entitled to terminate the fund unilaterally, however, the board of directors of Fidelity UCITS II ICAV may terminate the fund by way of liquidation or merger.

Objectives

Investment objective The fund aims to provide investors with a total return, taking into account both capital and income returns, which reflects, before fees and expenses, the return of the MSCI World Index (the "Index").

Investment policy The investment policy of the fund is to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the fund's performance and that of the Index.

The fund will aim to replicate the Index by holding all of the Index securities in a similar proportion to their weighting in the Index.

The fund may use derivatives for efficient portfolio management and currency hedging purposes.

Investment approach The fund uses a benchmark "index tracking" (also known as "passive") investment management approach by tracking the Index. The Index is designed to reflect the performance of large and mid-capitalisation companies across developed market countries which comply with MSCI's size, liquidity and free float criteria. These criteria are designed to identify those companies whose securities make up 85% of the publically traded market. The fund is not sponsored, endorsed, or promoted by MSCI, and MSCI bears no liability with respect to any such funds or any index on which the fund is based. The prospectus and relevant supplement contains a more detailed description

of the limited relationship MSCI has with Fidelity and any related funds. For more information on the Index, please refer to the publically available information on the index provider's website at <https://www.msci.com/index-methodology>.

Benchmark MSCI World Index, an index that does not take into account ESG characteristics. Used for: index tracking.

Distribution policy As this is a non-distributing share class, dividends are re-invested.

Base Currency USD

Further information You may sell (redeem) or switch some or all of your shares to another fund on any Valuation Day. This key information document describes a sub-fund of Fidelity UCITS II ICAV. A separate pool of assets is invested and maintained for each sub-fund of Fidelity UCITS II ICAV. The assets and liabilities of the fund are segregated from those of other sub-funds and there is no cross-liability among the sub-funds. For more information, please consult the prospectus and latest reports and accounts which can be obtained free of charge in English and other main languages from the Management Company. These documents and details of the Remuneration Policy are available via www.fidelityinternational.com. The Net Asset Value of the fund is available at the registered office of the Management Company, and at www.fidelityinternational.com.

Intended retail investor

This product may appeal to investors with a basic knowledge of and no or limited experience of investing in funds, who plan to hold their investment for a recommended holding period of at least 5 years, who seek capital growth over the recommended holding period and income; and who understand the risk of losing some or all the capital invested.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks: none.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10

years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment between (01/2025 - 04/2026).

Moderate scenario: This type of scenario occurred for an investment between (07/2019 - 07/2024).

Favourable scenario: This type of scenario occurred for an investment between (03/2020 - 03/2025).

What happens if the Management Company is unable to pay out?

The assets and liabilities of this product are segregated from those of the Management Company. There is no cross-liability between these entities, and the product would not be liable if the Management Company or any delegated service provider were to fail or default. This product does not participate in an investor compensation scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- EUR 10 000 is invested.

Example Investment 10 000 EUR		
Scenarios	If you exit after 1 Year	If you exit after 5 years (recommended holding period)
Total Costs	14 EUR	94 EUR
Annual Cost impact (*)	0.1%	0.2% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 12.8 % before costs and 12.7 % after costs.
