What is this product?

Type

Shares of a sub-fund of Fidelity Funds SICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS).

Term

This fund is open-ended. The Management Company is not entitled to terminate the fund unilaterally, however, the board of directors of Fidelity Funds SICAV may terminate the fund by way of liquidation or merger.

Objectives

Investment objective The fund aims to achieve capital growth over the long term and provide income.

Investment policy The fund invests at least 70% of its assets, in equities of companies of any capitalisation that are listed, headquartered, or do most of their business in Australia.

The fund may also invest in Australian corporate hybrid and debt securities if the Investment Manager believes they offer better investment opportunities than the related equity.

The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

below investment grade bonds: up to 20%

corporate bonds of any credit quality listed in the Australian stock exchange: up to 30%

collateralised and securitised debt instruments: up to 20%

hybrids and contingent convertible bonds (CoCos): less than 30%, with less than 20% in CoCos

The fund's largest ten holdings may account for 50% or more of its assets, resulting in portfolio concentration.

The fund will have a mixture of investments in larger, medium and smaller sized companies.

Investment approach In actively managing the fund, the Investment Manager

considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors. The Investment Manager takes into account Sustainability Risks in its investment process. For more information, see "Sustainable Investing and ESG Integration".

Derivatives policy The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

Benchmark S&P ASX 200 Index. Used for: investment selection, risk monitoring, and performance comparison. The fund invests in securities of the benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark, and its performance over any period may or may not deviate significantly from that of the benchmark.

Distribution policy As this is a non-distributing share class, dividends are re-invested.

Base Currency AUD

Risk Management Method: Commitment.

Further information You may sell (redeem) or switch some or all of your shares to another fund on any Valuation Day. This key information document describes a sub-fund of Fidelity Funds. A separate pool of assets is invested and maintained for each sub-fund of Fidelity Funds. The assets and liabilities of the fund are segregated from those of other sub-funds and there is no cross-liability among the sub-funds. For more information, please consult the prospectus and latest reports and accounts which can be obtained free of charge in English and other main languages from the Management Company. These documents and details of the Remuneration Policy are available via www.fidelityinternational.com. The Net Asset Value of the fund is available at the registered office of the Management Company, and at www.fidelityinternational.com.

Intended retail investor

This product may appeal to investors with a basic knowledge of and no or limited experience of investing in funds; who plan to hold their investment for a recommended holding period of at least 5 years; who seek capital growth over the recommended holding period and income; and who understand the risk of losing some or all the capital invested.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks: none.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If the Management Company is not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment between (09/2024 - 04/2026).

Moderate scenario: This type of scenario occurred for an investment between (01/2018 - 01/2023).

Favourable scenario: This type of scenario occurred for an investment between (03/2020 - 03/2025).

What happens if the Management Company is unable to pay out?

The assets and liabilities of this product are segregated from those of the Management Company. There is no cross-liability between these entities, and the product would not be liable if the Management Company or any delegated service provider were to fail or default. This product does not participate in an investor compensation scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- USD 10 000 is invested.

Example Investment 10 000 USD		
Scenarios	If you exit after 1 Year	If you exit after 5 years (recommended holding period)
Total Costs	100 USD	570 USD
Annual Cost impact (*)	1.0%	1.1% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.8 % before costs and 7.8 % after costs.
