Publication Date: 30-04-2026

What is this product?

Type

Shares of a sub-fund of Fidelity Funds SICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS).

Term

This fund is open-ended. The Management Company is not entitled to terminate the fund unilaterally, however, the board of directors of Fidelity Funds SICAV may terminate the fund by way of liquidation or merger.

Objectives

Investment objective The fund aims to provide an absolute positive return with low correlations to traditional asset classes over the medium to long term.

Investment policy The fund uses a combination of diverse investment strategies in order to achieve its objective, include arbitrage, equity hedge, fixed income and macro strategies. The strategies will be primarily implemented by taking long and short exposure to a range of asset classes such as equities, corporate and government investment grade and below investment grade bonds, infrastructure, property, commodities, money market instruments and currencies from anywhere in the world, including emerging markets. These investments may be denominated in any currency.

The fund may invest in the following assets according to the percentages indicated:

China A and B shares and listed onshore bonds (including urban investment bonds) (directly and/or indirectly): less than 30% (in aggregate)

collateralised and securitised debt instruments: less than 20%

eligible commodity exposure: up to 10%

hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos

SPACs: less than 5%

The fund may also invest in China offshore bonds (including dim sum bonds). The fund's exposure to distressed securities is limited to 10% of its assets. The Investment Manager aims to outperform the benchmark.

Investment approach In actively managing the fund, the Investment Manager combines qualitative and quantitative market analysis into a disciplined portfolio construction process to allocate investments across various strategies, such as long-short equity, arbitrage, fixed income and macro. Arbitrage strategies aim to profit from the price difference between instruments that are related and judged to be mispriced. This may involve the simultaneous purchase and sale of related financial instruments. Equity hedge strategies aim to profit from identifying undervalued stocks and either selling overvalued

stocks or hedging the market risk associated with the undervalued stocks. Fixed Income and Macro strategies are grouped together as strategies can cross both disciplines. Fixed Income strategies aim to produce consistent returns either within fixed income markets or through relative value strategies within markets such as corporate and emerging market bonds. Macro strategies traditionally use a top-down approach which studies macro-economic and political factors to invest in different asset classes across global markets. The Investment Manager takes into account Sustainability Risks in its investment process. For more information, see "Sustainable Investing and ESG Integration".

Derivatives policy The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may use long or short positions. The fund will take long positions in securities that are deemed to be undervalued and short those deemed to be overvalued. Short exposure will only be achieved through the use of derivatives.

Benchmark Secured Overnight Financing Rate (SOFR). Used for: performance comparison, outperformance and performance fee calculation. The fund is not benchmark-constrained and its performance over any period may or may not deviate significantly from that of the benchmark.

Distribution policy As this is a non-distributing share class, dividends are re-invested.

Base Currency USD

Risk Management Method: Absolute VaR limited to 20%. Expected leverage: 600% (may be higher or lower but not expected to exceed 750%).

Further information You may sell (redeem) or switch some or all of your shares to another fund on any Valuation Day. This key information document describes a sub-fund of Fidelity Funds. A separate pool of assets is invested and maintained for each sub-fund of Fidelity Funds. The assets and liabilities of the fund are segregated from those of other sub-funds and there is no cross-liability among the sub-funds. For more information, please consult the prospectus and latest reports and accounts which can be obtained free of charge in English and other main languages from the Management Company. These documents and details of the Remuneration Policy are available via www.fidelityinternational.com. The Net Asset Value of the fund is available at the registered office of the Management Company, and at www.fidelityinternational.com.

Depository Brown Brothers Harriman (Luxembourg) S.C.A.

Intended retail investor

This product may appeal to investors with a basic knowledge of and no or limited experience of investing in funds; who plan to hold their investment for a recommended holding period of at least 3 years; who seek capital growth over the recommended holding period; and who understand the risk of losing some or all of the capital invested.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 3 Years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks: leverage, interest rate, emerging markets.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If the Management Company is not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

You will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment between (03/2017 - 03/2020).

Moderate scenario: This type of scenario occurred for an investment between (10/2018 - 10/2021).

Favourable scenario: This type of scenario occurred for an investment between (03/2020 - 03/2023).

Recommended holding period		3 years	
Example Investment		EUR 10 000	
Scenarios		If you exit after 1 Year	If you exit after 3 years (recommended holding period)
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs Average return each year	8 480 EUR -15.2 %	8 770 EUR -4.3 %
Unfavourable	What you might get back after costs Average return each year	9 400 EUR -6.0 %	9 670 EUR -1.1 %
Moderate	What you might get back after costs Average return each year	10 350 EUR 3.5 %	11 190 EUR 3.8 %
Favourable	What you might get back after costs Average return each year	11 300 EUR 13.0 %	11 990 EUR 6.2 %

What happens if the Management Company is unable to pay out?

The assets and liabilities of this product are segregated from those of the Management Company. There is no cross-liability between these entities, and the product would not be liable if the Management Company or any delegated service provider were to fail or default. This product does not participate in an investor compensation scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- EUR 10 000 is invested.

Example Investment 10 000 EUR		
Scenarios	If you exit after 1 Year	If you exit after 3 years (recommended holding period)
Total Costs	109 EUR	343 EUR
Annual Cost impact (*)	1.1%	1.1% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.0 % before costs and 3.8 % after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	0.0% of the amount you pay in when entering this investment.	0 EUR
Exit costs	We do not charge an exit fee for this product.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.1% of the value of your investment per year. This is an estimate based on actual costs over the last year.	10 EUR
Transaction costs	1.0% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	99 EUR
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	N/A

How long should I hold it and can I take money out early?

Recommended holding period: 3 Years

The recommended holding period is based on our assessment of the risk and reward characteristics and costs of the product. Order Processing: Requests to buy, switch or sell fund shares that are received and accepted by the Management Company by 4:00 PM CET (3:00 PM UK time) on any Valuation Day are ordinarily processed at the NAV for that Valuation Day. Settlement normally occurs within 3 business days.

How can I complain?

If you wish to make a complaint about this product or the conduct of the Management Company please visit www.fidelityinternational.com. Alternatively, write to The Management Company at 2a, Rue Albert Borschette, BP 2174, L1246 Luxembourg or email fidelity.ce.crm@fil.com. If you have a complaint about the person who advised you about this product, or who sold it to you please contact them for their complaints process.
